When does NEW online pay back?

A simple model of the money going out (building the platform, running it, marketing) and the profit coming in from the bag and clothing shop, AC service bookings and AC sales. Online starts from zero: existing offline company clients are not counted.

Scenario shown: Expected. Launch Mar 2027.

Investment

৳4.48 lakh

Building the platform and set-up

Monthly profit starts

Month 11

Jan 2028, and every month after

Investment paid back

Month 23

Jan 2029

Total after 36 months

৳22.1 lakh

Profit minus everything spent, investment included

The path to profit

MONTH 0

Build and launch

Invest ৳4.48 lakh. Apps, website and admin go live.

MONTHS 1 TO 10

Find first customers

Sales start small. Ads, server and staff cost more than the profit.

FROM MONTH 11

Profit every month

Each month earns more than it spends. The loss starts shrinking.

MONTH 23

Investment paid back

Everything spent so far has come back.

AFTER MONTH 23

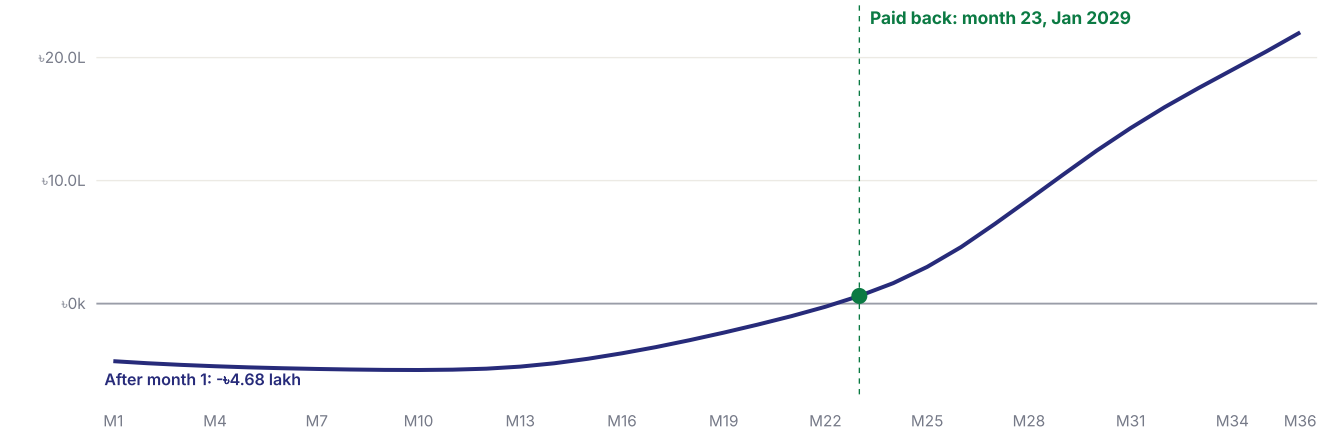

Pure profit

From here, monthly profit is the return on the investment.

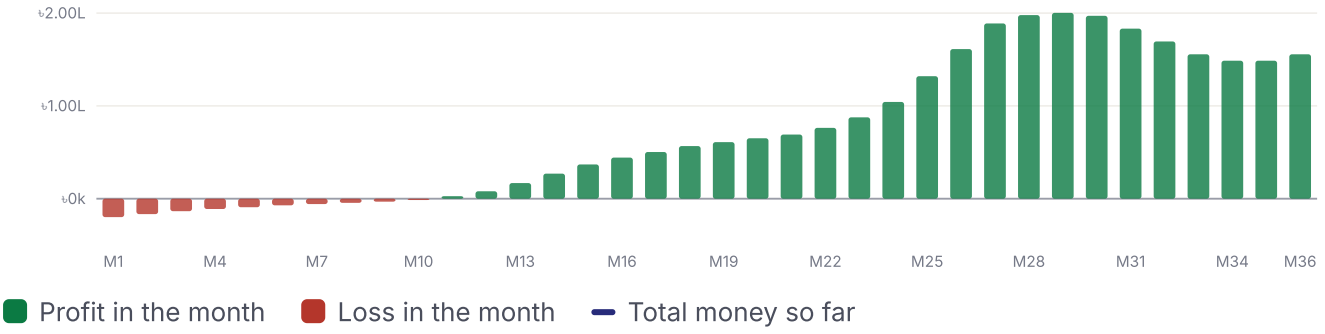

Money over three years

Total money so far

Starts below zero by the investment. Crosses zero when the investment is paid back.

Profit or loss in each month

Three scenarios side by side

SCENARIO	SALES IN MONTH 1	GROWTH	MONTHLY PROFIT FROM	INVESTMENT PAID BACK	TOTAL AFTER 24 MONTHS	TOTAL AFTER 36 MONTHS
Slow start	15 orders, 6 services, 0.5 AC	7% a month	Month 23	After month 36	**-৳7.58 lakh**	**-৳3.00 lakh**
Expected (shown above)	25 orders, 10 services, 1 AC	10% a month	Month 11	Month 23	**৳1.67 lakh**	**৳22.1 lakh**
Good start	40 orders, 15 services, 2 AC	14% a month	Month 3	Month 14	**৳24.8 lakh**	**৳63.1 lakh**

What makes it pay back sooner

- **Start selling on the Facebook page now.** Blossom Classy already has about 5,000 followers and no products. Posting bags and clothing before launch builds the first buyers, so month 1 does not start from zero.
- **Launch before the hot season.** AC service demand in Dhaka peaks from March to September. A launch in February or March catches it.
- **Bring known customers online.** Offline company clients can stay offline, but their staff can book home AC service in the app.
- **Keep ads steady, not big.** A small monthly budget that runs every month beats one large campaign.
- **Vendor commission is extra.** Sales by other sellers on the marketplace earn NEW 8 percent. It is not counted here.

This is a model, not a promise. It uses assumptions about orders, growth and profit per sale that only real sales can confirm. Replace them with your own numbers. AC service follows the season (busier from March to September). The 36 months start at launch. VAT and tax are not included.

Assumptions in this view: launch Mar 2027; month 1 sales 25 shop orders, 10 AC services, 1 AC units; growth 10% a month up to 300 orders, 150 services and 10 AC units a month; average order ৳1,800 keeping 22%; average service ৳1,600 keeping 30%; AC price ৳55,000 keeping 7%; 60% paid online at 2% fee; monthly ads ৳20,000, staff ৳12,000, server and SMS ৳5,000; set-up ৳8,000 once.
